Dr. Michael R. Panzer, Chairman Brett L. Tholborn, Trustee Dan MacDonnell, Trustee

RECLAMATION DISTRICT NO. 1608 LINCOLN VILLAGE WEST

Daniel J. Schroeder, Attorney Jean L. Knight, Secretary Christopher H. Neudeck, Engineer Joe Bryson, Superintendent

BOARD OF TRUSTEES MEETING WEDNESDAY, JULY 3, 2019 8:00 A.M. ENGINEER'S REPORT

I. PLAN REVIEW

A. Review status of Annual Levee Inspection of the District's Levee system.

EXHIBIT A: Violation/Remedy Tracking for 2019 Inspection

B. Review proposal to notice mid-year all the levee lot owners about the need to maintain their vegetative growth along the levee to provide the District personnel inspectability during high water inspections

EXHIBIT B: Sample correspondence from KSN Inc. along with sample photos of before and after vegetation clearing for inspectability sake

II. FEMA MAPPING STATUS

A. Review progress of LOMA application relative to the District's interior lake drainage system.

EXHIBIT C: KSN Inc. LOMA status summary dated June 20, 2019.

III. SEDIMENT REMOVAL PROJECT

A. Review progress of permitting process with the Board of Trustees.

EXHIBIT D: KSN Inc. Summary of work activities associated with the sediment removal project dated June 20, 2019.

EXHIBIT E: KSN Inc. LOMA -Solano Archaeologist Services (SAS), Scope of Work and fee for Section 106 Compliance.

	Li	ncoln Village Wes	t Violation	/Remedy Tracking 201	9		
Address	Homeowner	Violation Type	Violation Notice Sent	Homeowner Response Date (required within 7 days) Phone	Homeowner Response Date (required within 7 days) Written	Home Owners Second Notice	Remedy Completion Date
		Northe	ast Quadrar	t Violations			
7050 Bridgeport Circle	Todd & Anna Bowman	vegetation	3/29/2019	5/23/2019			

NOTES:

Dense vegetation exists on the existing chain link fence and trimming within two feet of the ground is required in order to see toe. Nothing changed since last inspection, 2016 Correspondence on record for the same violation.

5/23/19 WLF spake with Joe Bryson and Bowman is working on clearing vegetation.

7056 Bridgeport Circle Anthony & Candace Lomax vegetation 3/29/2019 5/23/20	7056 Bridgeport Circle	Anthony & Candace Lomax	vegetation	3/29/2019				5/23/2019
---	------------------------	-------------------------	------------	-----------	--	--	--	-----------

NOTES:

Dense hedge in lieu of fence line prevents inspection of the levee toe - no change since last inspection. No record of written correspondence from last year, but correspondence of an unspecified violation exists from 2016 inspection.

4/8/19 WLF spoke with Mr. Lomax and he said he has trimmed vegetation to standard. He would like an inspection asap before it grows back and I explained that it was to be maintained at all times to the 2' off the ground standard.

5/23/19 WLF spoke with Joe Bryson and he inspected vegetations clearing of Lomax's property and it was in compliance.

3003 Stolle River Circle	Luis & Alicia Bustalliante	vegetation	3/29/2019			3/23/2019
3603 Stone River Circle	Luis & Alicia Bustamante	vocatation	3/29/2019	100	1	5/23/2019

NOTES:

Landside levee slope outside of fence is covered in dense vegetation. Last year, homeowner was approved to clear vegetation in 45-degree angles on landside slope but the vegetation was not cleared to the root and it quickly grew back. The same clearing orientation can be used again this year but homeowner must remove vegetation roots to prevent rapid regrowth.

5/23/19 WLF spoke with Joe Bryson and he inspected vegetations clearing of Bustamante's property and it was in compliance

Southwest Quadrant Violations							
6347 Embarcadero Drive	Charles & Farley Staniec	vegetation + encroachment	3/29/2019	5/23/2019			
IOTES:					4-		

NOTES:

Vegetation clearing required on waterside slope - no change since last inspection. Vegetation along landside slope (western portion of property) was trimmed last year but has grown back to over 24-inches in height and is dense. Also, dilapidated wooden structure on east waterside slope, light poles do not have an encroachment permit on file. Dilapidated wooden structure can probably be removed.

4/8/19 CHN spoke with Chuck Staniec and discussed conducting an inspection of his lot at 6347 Embarcadero Drive. Mr. Staniec indicated that he is still travelling to Dublin for his Auto repair business but gets home a at 5:30 most evenings. I indicated that I would organize an inspection in the next couple of weeks and give him a call 916-233-8181.

5/23/19 WLF spoke with Joe Bryson and he stated that Staniec has hired a few of Joe Bryson's guys to clear the vegetation and bring property to District standard. Will start clearing on 6/1/19.

6333 Embarcadero Drive	Michael & Krystle Balduzzi	vegetation	3/29/2019	5/23/2019		

NOTES:

Vegetation clearing required on eastern 50% of waterside slope where dense Blackberry patch is located. The blackberry bushes are extremely dense and well over three feet high, allowing no visual of the waterside slope in the vicinity of the bushes.

<u>5/23/19 WLF spoke with</u> Joe Bryson and he stated that Balduzzi is working on the vegetation clearing and will follow up in week.

6249 Embarcadero Drive	Roger & Linda Fisher	vegetation	3/29/2019	4/3/19 Phone Call		5/23/2019

NOTES:

Vegetation clearing required on landside levee slope, as it is too dense to see any underlying slope. An example of how to trim is in the homeowner's violation letter package for 2019.

4/3/19 CHN spoke with Joe Bryson who is in contact with Roger Fisher. Mr. Fisher was seeking advice as to wheter the vegetation free zone below his deck ramp out to the landside slope was able to be considered as a cleared area. I suggested that it was too difficult for us to see under the access ramp and that he needed to clear his ivy accordingly with the two (2') foot strip every fifteen (15') feet. On Thursday, April 4, 2109 KSN Inc. attn to CHN, received a letter from the Fishers confirming their intent to clear the necessary vegetation by June 30, 2019

5/23/19 WLF spoke with Joe Bryson and he inspected vegetations clearing of Fisher's property and it was in compliance. AJL added follow-up photo's of vegetation clearing to Fisher's file.

MAIL MERGE	

Re: Reclamation District No. 1608 – Lincoln Village West District, Year-Round Levee Encroachments and Vegetation Maintenance Requirements <u>REMINDER</u> in order for Homeowners along the Districts levees to Avoid Violations of Levee Encroachment Standards

Dear MAIL MERGE,

Periodically throughout the year, the District's Engineer, KSN, Inc., perform inspections of the District Levee. The most recent inspection was conducted this past February 2019. These inspections of the District levees and those residential lots along the levees are performed to ensure compliance with the District Standards so that Reclamation District 1608 (RD 1608) may more efficiently protect your homes and inspect its levee in emergency situations such as high-water events. The District Standards were adopted to establish guidelines for homeowners residing along the levee to follow in order to ensure all possible preventative measures are taken to maximize the District's flood protection and inspectability.

Of all the District Encroachment Standards, vegetation violations are the most frequent. Several homeowners have received one or more of these violations in recent months and years and this letter is a friendly reminder to All Levee Residences along the District's Levee to maintain the allowable vegetation growth year-round, as set forth in RD 1608's Levee Encroachment Standards. Maintenance of vegetation per District Standards is vital, as it enables District Personnel to view the conditions of the levee and identify problems such as cracking, boils, and seepage immediately and to coordinate the requisite repair in a timely manner. Overgrown brush and dense vegetation on the levee slopes puts the homeowner at risk by hindering the ability of District personnel to view any such potential problems.

As it is important that all violations of District Standards be addressed immediately, ongoing violations will be reported to the District Board and could lead to subsequent legal action in the future, as set forth in the District Standards. The RD 1608 Board meets the first Wednesday of the month at 8:00 am at the District attorney's office, Neumiller & Beardslee, located at 3121 March Lane and your participation is greatly encouraged RD 1608 Levee Encroachment Standards can be found at www.RD1608.com.

If you have any questions, please contact the undersigned @ (209) 946-0268 or cneudeck@ksninc.com. Additionally, a standard visual guide of typical vegetation thinning guidelines and photos is provided with this letter.

Sincerely,
KJELDSEN, SINNOCK & NEUDECK, INC.

Christopher H. Neudeck, P.E. RD 1608 - District Engineer

LINCOLN VILLAGE WEST LOMA

TASK 1: PREPARE LEGAL DESCRIPTIONS

Task was <u>Completed in October</u>

TASK 2: PREPARE APPLICATION

• 10 Applications were created, one for each subdivision. (Completed in October/November)

TASK 3: PACKAGE AND SUBMIT SUPPORTING DOCUMENTS

- Prepared a Cover letter referencing the previous studies prepared and supporting the LOMR and applicability to the LOMA applications.
- The application and supporting materials has been uploaded to the FEMA LOMA application system Completed November 15th & 16th

LOMA REVIEW COMMENTS:

- A FEMA Comment Letter was received on 12/17/18, Stating that every page of the Elevation form was to be stamped and signed.
 - o Signed and Stamped forms will be resubmitted to FEMA on 12/18/18.
- Numerous applications are requesting structure mapped structures for lots containing multiple structures. This
 endeavor would be time consuming. Instead preparation of a legal meets and bounds description will be
 provided to clearly delineate the lake boundary. The information is anticipated to be submitted by late January.
- The Lake Boundary Metes and Bounds Descriptions were completed and submitted to FEMA on February 28th.
- FEMA commented on the metes and bounds description and requires that we identify the land to be removed rather than focusing on the lake boundary. KSN has meet with FEMA reviewers to determine their exact requirements and will resubmit an updated metes and bounds description of affected lots surrounding the Lakes per FEMA requirements
- The updated FEMA metes and bounds description requires KSN to digitize (recreate in CAD) line work from the subdivision maps and merge current accurate ground survey data, gathered for the lakes, with historic survey data collected in the 1970's. Merging the two data set posed some challenges to which an extension was sought and granted.
- KSN submitted the updated FEMA metes and bound description and received duplicate comments on 2 submittals. We are currently seeking clarification of the comments.
- FEMA's latest round of comments focused on how the metes and bounds line crosses decks and docks. FEMA requires that any element such as a deck, dock, or stairs, that are directly attached to a structure, must not cross over the lake bulkhead and be supported by a pier in the lake and requests that KSN certify that this condition does not exist. In order to do so a boat survey was conducted with the findings are attached as Exhibit A.

FEMA provided guidance on what was required to process the metes and bounds (M&B) description. KSN edited per their direction and resubmitted. FEMA followed up with completely different set of criteria with regards to the M&B line. This time focusing on the how the M&B line crosses features and outlined the following criteria:

The M&B must not:

- I. Cross any structures;
- II. Cross any elements attached to a structure; or
- III. Cross over the water boundary.

FEMA is requiring certification that the three conditions outlined are satisfied. KSN is the originator of the M&B line work and therefore knows that items I & III are satisfied however elements II was undetermined and required investigation. KSN coordinated with Lincoln Lake Association and was able to arrange for a boat tour.

The Criteria of the boat tour was to review those properties that appear to contain an element (deck/stairs/dock) that is:

- attached to the structure, and
- extends out over the water, and
- is supported by members extending into the water

The boat tour was performed on Friday 5/3/19. Using the criteria set above a total of 21 structures were investigated and grouped according to the following three categories.

- Category I consists of structure whose elements were attached to the structure however do not extend beyond the lake bulkhead.
 - There are a total of 4 structures within this category and were eliminated from the review as the properties contained elements that ended behind the lake bulk head and did not extend over to the Lake.
 - Category I structures do not require additional qualifying and should reach an "out of the Special Flood Hazard Area (SFHA)" determination without issue.
- II. **Category II** consists of structures containing an element that is attached and extends over the SFHA <u>but is supported by high ground or the structure's foundation</u>.
 - 5 of the identified structures were within this category.
 - Category II structures will require that the metes and bounds description to be edited such that the description outlines the attached deck rather than crossing underneath the deck as currently shown. These structures will require more detailed information to prove their compliance however it should not require much more than an additional survey elevation, photo of supports and edited M&B descriptions.
- III. Category III consists of structures containing an element that is: 1) Attached to the structure; 2) extends over the SFHA; and 3) Is supported by pier extending directly into the SFHA.
 - There are 12 structures that meet this description.

Category III structures are non-compliant and will not receive an out of the SFHA Determination in their current state of construction. There are a number of solutions that will allow a favorable determination however **they will require modification to the element**. Category III elements are predominately found in condominium lots.

Category III solutions are presented in no specific order of preference. Solutions A-C will lead to favorable determination however it is highly dependent on the resident's willingness to modify existing elements.

- A. Detached element: Detaching the supports from the structure and installing a new foundation supports such that the deck is self-supporting and provides the separation required. Under this solution, the piers can remain in place. By certifying that the deck is detached, a determination should follow suit.
- B. Reconfigured the Water Side Supports: The resident must install new supports on high ground leaving a cantilevered section or installing angled supports along the cantilevered section. The pier support must be removed so that only high ground supports are touching the element.
- C. Remove these properties from the Determination: We can adjust the Mets and Bounds description such that we remove a specific property from the determination. Under this alternative only compliant structures will be mapped out of the SFHA.
- D. The last solution is a do nothing alternative. It is unknown if the flood insurance requirements are in effect but as the requirement may become apparent, the cost may force individuals to make modifications and allow certification to continue.

SEDIMENT REMOVAL PROJECT

TASK 1: PROJECT MANAGEMENT & DESIGN TASK BUDGET STATUS: \$48,135 (71% of task budget)

PM:

- Through discussion with the project biologist we were informed that the USACE has recently (within the last year) become more emboldened to ensure compliance with federal requirements for cultural and historic preservation through a Section 106 consultation. The team has held internal discussions with regard to the best way to handle this requirement understanding that there are no historic buildings or indication of any ancient burial sites, however none the less, USACE will delay the processing of the project until consultation is complete. KSN has solicited a small Archaeologist service, Solano Archaeologist Services (SAS), to prepare the report on short order to maintain progress. The enclosed attachment contains the Scope of Work and fee for Section 106 Compliance.
- Additional Authorization: Retention of the SAS, coordination and permitting follow up are unanticipated efforts
 and therefore billed on a time and material basis. The effort including SAS fees are estimated to be
 approximately roughly \$18,000.

TASK 2: SURVEY & MAPPING

TASK BUDGET STATUS: \$10,386 (18% of task budget)

No survey effort this period

TASK 3: ENVIRONMENTAL ASSESSMENTS & DOCUMENTATION TASK BUDGET STATUS: \$87,829 (105% of task budget)

No activity

TASK 4: DREDGING OPERATIONS SUPPORT & PERMITTING TASK BUDGET STATUS: \$115,170 (62% of task budget)

Permitting:

No Activity

TASK 5: CONSTRUCTION MANAGEMENT & DREDGING TASK BUDGET STATUS: \$0 (0% of task budget)

No Activity

Solano Archaeological Services

CULTURAL RESOURCE MANAGEMENT

Cultural Resources Scope of Work for the Lincoln Village West Sediment Removal Project, City of Stockton, San Joaquin County, California

Prepared for KSN

Solano Archaeological Services (SAS) proposes to conduct a Section 106 compliant cultural resources inventory for KSN, Inc. (Contact: Tessa Marlow) to determine if cultural resources are present in the Lincoln Village West Sediment Removal Project (Project) area of potential effects (APE). The Project requires a Section 404 permit application with the U.S. Army Corps of Engineers (USACE). As such, the inventory prepared by SAS is required to be compliant with Section 106 and USACE guidelines. The inventory would be reviewed by the USACE.

The APE includes a 5,500 foot section of 14-Mile Slough that will be dredged to a depth of 5 feet NAVD88, and placement of several miles worth of discharge pipe.

Regulatory Setting

Section 106 of the National Historic Preservation Act

The project is seeking a Section 404 permit from the U.S. Army Corps of Engineers (USACE) under a separate National Environmental Policy Act (NEPA) process. As such, this proposed cultural resources study will be prepared in compliance with Section 106 of the National Historic Preservation Act (NHPA) (16 USC 470 et seq.), as amended and its implementing *regulations* at Title 36 *Code of Federal Regulations* Part 800 (36 CFR 800). Undertakings include activities directly carried out, funded, or permitted by federal agencies. The report will address the identification and treatment of any discovered cultural resources in the Project APE. As defined by Section 106, cultural resources can include historic or prehistoric sites, structures, buildings, districts, and objects, each of which is evaluated for its eligibility for listing in the National Register of Historic Places (NRHP). The Section 106 process mandates that foreseeable significant impacts to resources eligible for NRHP listing must be mitigated.

Historic properties are cultural resources that are listed on, or are eligible for listing on, the NRHP (36 CFR 800.16[1]). The implementing regulations for Section 106 of the NHPA (36 CFR Part 800) require consultation with the State Historic Preservation Officer, the ACHP, federally recognized Indian tribes and other Native Americans, and interested members of the public throughout the compliance process. The four principal steps are:

- Initiate the Section 106 process (36 CFR Section 800.3).
- Identify historic properties, resources eligible for inclusion in the NRHP (36 CFR Section 800.4).
- Assess the effects of the undertaking to on historic properties within the APE (36 CFR Section 800.5).
- Resolve adverse effects (36 CFR Section 800.6).

National Register of Historic Places (NRHP)

The NRHP listing criteria are as follows (36 CFR Section 60.4):

Solano Archaeological Services

CULTURAL RESOURCE MANAGEMENT

The quality of significance in American history, architecture, archeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association and:

- (a) that are associated with events that have made a significant contribution to the broad patterns of our history; or
- (b) that are associated with the lives of persons significant in our past; or
- (c) that embody the distinctive characteristics of a type, period or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
- (d) that have yielded, or may be likely to yield, information important in prehistory or history.

Scope of Work

The Scope of Work for this project includes the following:

- Archaeological and Historical Records Search and Literature Review. A standard pre-field comprehensive records search will be conducted at the Central California Information Center (CCIC) at California State University, Stanislaus. The CCIC will review the California Historical Resources Information System for any listings within a half mile radius of the Project, identifying any pre-existing archaeological sites and studies. The following State of California Department of Parks and Recreation and Office of Historic Preservation inventories will also be reviewed:
 - California Inventory of Historic Resources
 - National Register of Historic Places
 - California Register of Historic Places
 - California Historical Landmarks
 - California Points of Historical Interest

Historic topographic maps, GLO plats, and soil survey maps will also be researched. An extensive analysis of California tribal territories and ethnographic villages will be conducted inhouse.

All records search material will be thoroughly analyzed before fieldwork commences.

2. Native American Consultation. The Native American Heritage Commission (NAHC) will be contacted to review the Sacred Lands database for cultural resources in the APE. Additionally, the NAHC will provide a list of Native American consultants who will be notified in writing of the Project. SAS will engage selected Native American groups for two rounds of continued consultation by telephone and email only. In-person meetings are not a regulatory requirement and are not considered part of this scope. The purpose of this level of consultation is to acquire information on potential unrecorded cultural resources and/or sacred lands that Native American groups identify as being in the APE, and to gather preliminary recommendations. This consultation is not to be misconstrued with SB 18 or AB 52 consultation, which are not part of this scope. All of the Native American responses and recommendations will be documented and

Solano Archaeological Services

CULTURAL RESOURCE MANAGEMENT

included as part of this study, and a correspondence log with accompany the report in an appendix.

- 3. Land-Use Research. SAS will research land-use associated with the APE, including analyzing General Land Office maps and if necessary establish a chain of ownership of the involved property to help with NRHP criteria evaluation.
- 4. Pedestrian Survey. An intensive pedestrian survey of the APE will be conducted by qualified SAS archaeologists walking 10 meter transects. This inventory includes coverage of the 5,500-foot dredge area, and both the primary and alternative discharge pipe alignments. Survey along the dredge line and discharge pipe alignments will include a 100-foot corridor. The archaeologists will take digital photographs of the project area, document thoroughly the survey findings, and utilize a sub-meter accurate Trimble Geo7X GPS device to digitally record locational information and produce corrected shapefiles to provide to the client. All sites and isolates will be recorded utilizing State of California Department of Parks and Recreation 523 series records.
- 5. USACE Formatted Section 106 Cultural Resources Inventory Report. SAS will prepare a single report that documents the historical and ethnographic setting of the project area, Native American consultation, background literature review and records search, and findings during fieldwork. All historic properties will be evaluated for NRHP criteria, and each resource will be recommended either eligible or ineligible for NRHP listing. If appropriate, a statement on findings of effect will be issued in correlation with the project design. The report will elaborate on the possibility of discovering unforeseen, subsurface cultural resources during construction, and state recommendations based on field findings and the records search analysis.

A Draft Report will be submitted to KSN, Inc. and USACE for review. Once the report is reviewed, SAS will incorporate review comments into the Final Report and re-submit to all involved agencies and organizations.

A copy of the final report will be submitted to the CCIC.

- 6. **Billing**. SAS will submit an invoice for 100% of the cost estimate with the submission of the Draft Report due to the extensive time period required for the USACE review. KSN, Inc. agrees to compensate SAS within 45 days of receipt of the invoice.
- 7. **Assumptions.** This Scope of Work assumes that:
 - 1) Construction monitoring, archaeological testing and evaluation, or any other mitigative measure needed as a result of this study are not considered part of this scope.
 - 2) No more than two rounds of USACE report review will be required.
 - 3) This scope includes recordation of up to three (3) cultural resources. Additionally identified resources will be billed at a rate of \$800/site.
 - 4) If historic structures are present in the APE, it may be necessary for a researcher meeting the federal *Secretary of the Interior's Professional Qualifications Standards* in history/architectural history to conduct an NRHP evaluation of the development.

Solano Archaeological Services CULTURAL RESOURCE MANAGEMENT

Should any of these assumptions prove false, the Scope of Work and Cost Estimate will need to be adjusted to reflect the additional work involved.

JULY 2019 RECLAMATION DISTRICT 1608 LEVEE SUPERINTENDENT JOE BRYSON

- 1. Levee patrol 00+ to 180+. Cleaned trash Plymouth gates. Serviced pumps and cleaned area.
- 2. Repaired three cut fences, Plymouth West. \$14,000
- 3. Started blacktop North East levee Plymouth Gates.
- 4. Received call man walking on levee with back pack..removed him.
- 5. Received call from Dave South East levee. Two people climbing over fence East of I-5. Asked them to leave.
- 6. Someone broke into the pump area, lots of damage.
- 7. Met with Caltrans Plymouth East of I-5. They are going to install some type of station.
- 8. Found small whole in levee road Plymouth East. Called Chris, think it's an old test site. Compacted and filled with asphalt.
- 9. Repair of In-Shape levee wall is completed. They did a good job. KSN and I checked the job every day.
- 10. Someone went over divider fence, Five Mile Slough. Left behind his pants, shirt and flip flops.
- 11. Received call regarding truck parked in front of blue gate at the Marina. Went out, could not get thru. Told the. To call and have it towed.
- 12. Man in truck camping, Eastside Five Mile Slough Plymouth
- 13. I am down two men, one man in August. Bryan will be working for Lonnie RD, three weeks in July.
- 14. Ran taggers off I-5 South East levee five times.
